

Model Card: German Credit default-risk baseline (logistic regression)

Model ID: sentinel-german-credit-logreg Version: 0.1.0 Generated: 2026-07-12 05:33 UTC

Purpose

Intended use

Data lineage

Rows / features	1000 rows, 19 features
Class balance	{'good': 700, 'bad': 300} (default 0.3)

- Stratified train/test split (750 train / 250 test, seed 42)

Methodology

Target	y = 1 if credit_risk == 'bad' (default event), else 0
Validation	Single stratified holdout; metrics on the test split (seed 42)

Performance (held-out test)

accuracy	0.756
precision	0.6129
recall	0.5067
f1	0.5547
Confusion	TN=151 FP=24 FN=37 TP=38

Top features by |coefficient|:

Fairness assessment

Disparity ratio	0.569 (threshold 0.8) - FLAGGED for review				
Group	n	Selection rate	TPR	FPR	Base rate
26-40	122	0.238	0.562	0.122	0.262
41-60	58	0.190	0.429	0.114	0.241
60+	16	0.250	0.500	0.214	0.125
<=25	54	0.333	0.481	0.185	0.500

Protected attribute 'age_band' was excluded from model features (age_years). Disparity ratio is min/max selection rate across groups. Below the 0.8 threshold (0.57) ? flag for review.
